

INTRODUCTION TO **Excellence in Education**

About Fastforward Training & Development

We are one of the most unique training & development organisations in the UK. Having spent many years specialising in the corporate arena we now bring our skills and specialist knowledge forward to the education profession.

Founded by a team of NLP specialists, behavioural psychologists, business leaders and international trainers, we have studied, and created some of the most far reaching personal development and communication training programs in the world. We teach educators how to develop and manifest positive behavioural change through a deeper and more skilled level of communication, leadership and personal development at all levels of the profession. Our intention is to advance your skills in:

- **COMMUNICATION**
Our approach is to empower positive and effective communication from within to effect positive and insightful communication without.
- **LEADERSHIP**
Our approach is to facilitate dynamic and progressive leadership through effective, sensitive and inspirational communication.
- **MOTIVATION**
We teach how to access motivational states of mind and how to structure language and presentation to motivate others.
- **ENGAGEMENT**
We model and teach methods of communication in teaching that capture and engage learners from the first instant to beyond the classroom.
- **GOALS**
We orientate people towards inspirational goals and facilitate a working understanding of how to effectively reach them and enjoy success.

Our training establishes a connection between communication and personal development that paves the way for excellence and progression in every aspect of learning environments.

We support delegates in delivering their learning back to their educational settings by providing access to resources and continued support to facilitate in-house training.
